

Memo from

JOSHUA LEDERBERG

To:

K. Warren
R. F.

MAR 21 1978

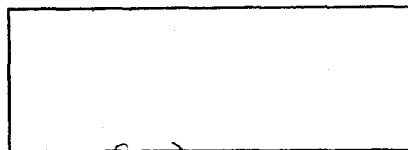

Guillermo Soberon
is the biochemist at Mexico
that I was suggesting you
invite to the course next
fall.

I believe he has been rector
of the University but that that is
a rotating position.

Surely some of your colleagues
at the foundations will know still
more about him.

Sincerely,

John.
